Full-Stack Developer

React, Node.js, Express, Sharp, MongoDB, Cloudflare Workers, Tailwind CSS

- Architected a privacy-first, zero-storage image optimization platform delivering sub-100ms transformations using in-memory Node.js buffers, eliminating disk I/O and data retention risk
- Developed an iterative binary-search quality-tuning algorithm to hit exact target file sizes (e.g. 50KB for visa/exam portal uploads), achieving 90%+ size reduction with minimal quality loss
- Deployed globally on Cloudflare Workers with custom SPA routing, automated CI/CD pipeline, and Google Search Console SEO optimization for improved discoverability

Full-Stack Developer

React, Node.js, Express.js, MongoDB Atlas, Redux Toolkit, Tailwind CSS, Vite, esbuild, Vercel

- Architected a full-stack MERN e-commerce bookstore platform featuring 350ms debounced search, dynamic price-range filtering (59–199), and a single-page 1-click checkout flow
- Engineered a serverless Express API with global Mongoose connection caching and atomic \$inc stock transactions, eliminating checkout race conditions and reducing cold-start latency by 40%
- Bundled serverless functions into a 65KB standalone distribution using esbuild and deployed on Vercel Edge with SPA rewrites, automated CI/CD, and JWT role-based access control

Full-Stack Developer

React, Node.js, Express.js, Socket.IO, MongoDB Atlas, Tailwind CSS, Cloudinary, JWT, Vercel, Render

- Architected a high-concurrency real-time chat platform delivering sub-10ms bidirectional message delivery via Socket.IO room multiplexing, multi-tab presence tracking, and debounced typing indicators
- Engineered zero-overhead database maintenance using MongoDB native TTL indexes (86,400s) for automated 24-hour message pruning, paired with a dual-layer authentication system (HTTP-Only cookies + Bearer token fallback) to handle cross-origin restrictions
- Developed role-based group channel governance with automated admin succession and a Multer + Cloudinary media pipeline with interactive lightbox zoom, deployed across Vercel Edge CDN and Render

PUBLICATIONS

- “A Systematic Framework for Text-to-Speech System,” IEEE, 2025 – Co-authored a research paper presenting a structured framework for TTS system design and implementation
